the 1990s, the number of people with a diagnosis of schizophrenia has increased in many countries (1).

There is a growing awareness of the need to improve the quality of life of people with schizophrenia, and the need to address the social and psychological consequences of the illness (2). The World Health Organization (WHO) has developed a number of instruments to assess the quality of life of people with schizophrenia (3).

The WHO Quality of Life (QoL) instrument is a self-rated measure of the individual's perception of their own quality of life (4).

2 TARIFF STREET

Search for the history of 2 Tariff Street and not a lot appears. That's because we invented it. Our entrance was the tradesman's entrance of 45 Dale Street.

Dig a little deeper though and the site begins to talk. Having always been associated with either textiles or metalworking, around 1858 the building was torn down, re-emerging as the showroom and warehouse of cotton spinners Ralph Waller & Co Ltd. The hydraulic fabric press in the kitchen was probably installed during the original build when the basement was filled with looms and weaving machines. The building remains standing now thanks to the huge girders in the basement, installed after a direct firebomb on the building during the Manchester Blitz of WWII.

The history of 2 Tariff Street is tied to the city's; part of its DNA, the fabric of the city - literally. Reinvented as Tariff & Dale, we continue its evolution, writing the next chapter of the building's annals.
